When it comes to automation, there is very little Wolf Robotics hasn’t done. We’ve been around long enough to see the inception of robotic use in general industry. We’ve always been on the cutting-edge of robotic innovation; creating automation solutions never done or seen before. Everyday, we forge the new way...the better way of getting the job done.

Our customers come back time after time for new automation solutions. Why? Because we build a partnership with our customers based on working with them to solve their production issues right—the first time.

**ARC Welding**
- Single Wire MIG
- Tandem Wire MIG
- TIG
- SAW

**Laser**
- Hot Wire
- Cold Wire
- Powder
- Hybrid

**Complementary Processes**
- Cutting (Plasma, Oxyfuel)
- 3-D Metal Printing
- Cladding
- Grinding
- Preheat
- Cladding

**Expertise in:**

**Heavy Welding**
- Multi-Pass
- Adaptive
- Sensor Integration
- Part Manipulation

**Additive**
- Cladding
- Path Generation
- 3-D Printing
- Calibration

**Multi-Process**
- Neck Changing
- Tool Changing
- Process Switching
- Path Reuse
