

Top 5 Reasons to Consider Automation

Save money, increase production and improve part quality.

1. Lower Operating Costs

- Reduce direct and overhead costs such as labor, utilities, and supplies.

2. Improved Product Quality

- Robotic automation inherently offers high repeatability, product consistency and accuracy.

3. Greater Production Rates

- Robots don't take vacations, breaks or leave at 5:00 PM, so your part production rates increase. You also have the ability to do offline programming so that new parts can be added to your production line easily.

4. Safer Workplace

- Robots can take over those tedious, hazardous tasks employees would rather not have to do.

5. Reduced Material Waste

- Consistency and accuracy of robotic automation will reduce breakages and waste due to poor quality.

If you think your business may benefit from automation...we can help. Give us a call.

CUSTOMER ASSISTANCE POLICY

The Lincoln Electric Company is manufacturing and selling high quality welding equipment, consumables, and cutting equipment. Our challenge is to meet the needs of our customers and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or advice about their use of our products. Our employees respond to inquiries to the best of their ability based on information provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or advice. Moreover, the provision of such information or advice does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or advice, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
